Fine Combination

Large Selection of Positioners and Peripherals
for Better and Faster TAWERS Welding

TM-1400WGIII

Positioners R series

Achieved better welding quality, faster welding speeds and smaller footprint of the robotic welding.

Single-axis positioners

Side mount 2-axis positioners

Payload:
250/500 kg

RJB 12/22

Payload:
1 000 kg

RJB 32

RJR 42

RJR 52

<Features>

- **Best-in-class motion speed**
Maximum speed is twice that of conventional models. (1 000 kg type)
- **Slim design allows compact welding system**
Depth is about 30 % smaller than conventional models. (500 kg type)
- **Space-saving cable connection method**
Cable protruding length is less than half of conventional models. (120 mm)
Connection to the other side is available as an option.
- **Dust proof construction and large hollow shaft diameter**
φ75 mm (1 000 kg type), φ55 mm (500/250 kg type)

Notes:
 · All the cables are flexible type.
 · The extension cables can only be used with the connection cables.

Notes:
 · All the cables are flexible type.
 · The maximum cable length is 30 m including the extension cable.
 · The 5.5 kW motor type connection cables and the TIG filler rotary unit connection cable cannot be extended.

Harmonizer

Simple teaching

Teaching example of complicated workpiece

Easy welding speed setting.

Welding speed can be set directly from robot regardless of pipe diameters. It eliminates complicated calculation and reduces teaching time.

Greatly reduced teaching points. (compared with conventional systems)

Linear, circular interpolations, and weaving movement are now available while rotating work with the positioner. This allows easy torch positioning for complicated workpieces and high precision welding with minimum teaching points.

Optimum welding position.

Optimum torch angle for the best bead shape is ensured by specifying the torch position to the workpiece from either absolute or relative position.

Easy system settings.

System can be set on site and adjustable by the user.

DTPS III Desk Top Programming & Simulation system

DTPS is a program simulation software developed exclusively for Panasonic robots. With this software, users can create and edit robot programs and verify robot motion offline.

<Features>

- Useful edit function (batch conversion, shifting, etc.)
- Highly-accurate movement simulation
- 3D graphics
- Identical to robot operation
- Simple CAD function for workpiece shape creation
- Graphic import function (standard)
- Multiple robot control ● Windows 8.1 / Windows 10

Wire Booster

Easy adjustment of wire feeding power and pressure on the wire

Good for stable feed of thin wire

Specifications

Model No.	YW-PCF041E00
Rated input voltage, number of phases	230 V, Single phase
Frequency	50 Hz
Rated input	38 VA
Applicable wire materials	Mild steel, Stainless steel, FCW, Aluminum
Applicable wire diameters	Mild steel, Stainless steel, FCW: 0.8 mm to 1.6 mm Aluminum: 1.2 mm, 1.6 mm 1.0 mm hard aluminum wire can only be used for TAWERS Pull MIG type.
Input start signal	DC24 V±3.6 V, 20 mA or more
Dimensions (WxHxD)	202 mm x 190 mm x 201 mm
Weight	4 kg

We provide products that are friendly to the environment.

As an earth-friendly company, Panasonic Corporation discourages the use of hazardous substances in our products. The products of Panasonic Corporation comply with the European RoHS directive.

Safety precautions ● Before attempting to use any welding product always read the manual to ensure correct use.
